## District Interviews on Choice

- One district has restricted an open reassignment policy dropping participation from a high of 70,000 at any given time to less than 13,000.
- Another district reported cutting teacher aides, dropout prevention programs, and magnet program staff and limiting other improvements such as additional reading, math, and science coaches and teacher staff development.
- Another district has eliminated academic electives with relatively low demand such as advanced placement, foreign language, and fine arts elective courses.

## Potential of Team Teaching

- Professional support and training for new teachers and out of field teachers by paring with fully qualified, experienced teacher
- Reduce student/teacher ratio/relieves pressure from rapid need for new classrooms
- Increased options for flexible grouping of students
- Help in classroom and lesson preparation
- Help with classroom management
